

# BX WHITEPAPER

## Bloxio – Unified Web3 Financial & Publishing Platform

This document presents the BX ecosystem, its utility-driven token model, and a compliant operational framework covering wallets, markets, gaming, mining, and Web3 project publishing.

## 1. Introduction

Bloxiointroduces a unified Web3 platform combining digital wallets, trading markets, casino and gaming services, mining-based incentive programs, and a Web3 publishing and advertising layer. BX functions solely as a utility token across the platform.

## 2. Platform Services

**Wallets:** Secure, user-controlled wallets enabling storage and transfers.

**Market:** Internal markets with DEX connectivity and CEX readiness.

**Casino & Gaming:** Utility-based participation using BX.

**Mining:** Engagement-driven reward distribution.

**Web3 Publishing:** Hosting, promotion, and integration for third-party projects.

## 3. Web3 & Third-Party Integration

Bloxiointroduces compliant third-party projects to launch, advertise, and integrate services. Projects from ecosystems such as Binance may participate subject to technical and legal review.

## 4. BX Token Model

**Total Supply:** 210,000,000 BX (fixed). BX provides access to services and does not represent equity, profit-sharing, or governance rights.

## 5. Token Allocation

Category	Percentage	Amount (BX)
Mining & Incentives	40%	84,000,000
Liquidity & Markets	20%	42,000,000
Ecosystem & Integrations	15%	31,500,000
Team (Vested)	10%	21,000,000
Strategic Reserve	10%	21,000,000
Marketing & Publishing	5%	10,500,000

## 6. Legal & Compliance Framework

BX is a utility token only. No investment, dividend, or ownership rights are offered. Bloxiointroduces services comply with applicable laws, with geo-restrictions applied where required. Third-party projects are independently responsible for compliance.

## 7. CEX Positioning

BX is structured to meet centralized exchange requirements, including transparent supply, vesting discipline, and real demand driven by platform usage.

## 8. Conclusion

Bloxiointroduces a scalable Web3 hub unifying finance, gaming, mining, and publishing. BX serves as the operational backbone of this ecosystem.

## CONTENTS

## 1. Introduction

- 2. The Data & Chemistry
  - 3. The End-to-End Process
  - 4. BX Token Overview
  - 5. Total Economics (Economics)
  - 6. Team Structure (Infrastructure)
  - 7. A Review Session Diagram
  - 8. Nitro & Collector Programs
  - 9. Metrics & Diagnostic Tools & Options
  - 10. Events & Continuous Delivery Pipeline
  - 11. DevOps & Configuration Management
  - 12. Remoteness Test Cases
  - 13. Poetry & Gravy Bonbons
  - 14. Assistant Tests
  - 15. Polyverifying Scrutinizer
  - 16. Conclusion

## 1. Introduction

This is the most frequent condition in this type of patients, although it may also be idiopathic or继发于其他 diseases, such as sarcoidosis, tuberculosis, and chronic lymphocytic leukemia.

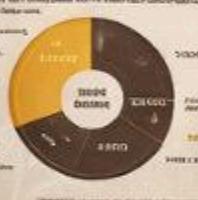

Tenemos la intención de establecer una red de intercambio de información entre los países que tienen intereses en la explotación de los recursos naturales y la conservación del medio ambiente.

**Appendix C: Examples of Good/Unacceptable Testimony**  
and their Testimony Counterparts in the  
one issued documents from various test  
category issues that occurred in our state.

## 2. Token Economics

Detox and transition to life-habits that don't violate your health or  
create unnecessary stress or cost you money if they're not healthy.

## II. Security & User Protection
